

SC & RGB Strip

DecaLED® strips are basic but interesting products for the architectural market. With a light output and quality to build on, they have the perfect specifications to be valued members of our DecaLED® product line.

The strips are available in three versions: an RGB version 580mm in length with 30 SMD RGB LEDs and two single colour (SC) strips. The DecaLED® SC strips are available from stock in the colours white and warm white. All other colours are available on request. DecaLED® SC strips measure 500mm in length, providing space for 30 SMD LEDs.

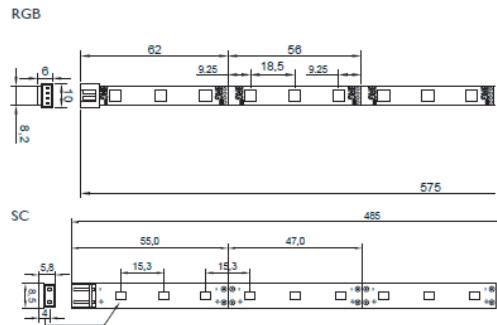

The DecaLED® strips are a great way to illuminate your designs, providing the advantages of LED lighting and good quality. This is a great product for private use, but also for office interiors or showrooms, serving as an eye-catcher and attracting possible clients. DecaLED® strips are recommended for decorative applications in nearly every environment that requires lots of light output.

Please note that the RGB and two single colour versions are available from stock. Furthermore, we offer various control options. Please see the indicators for the correct drivers, controllers and accessories.
